

WELCOME TO THE CURODONT™ WORLD

Now we can treat early cavities without a drill

What once seemed impossible is now a reality
—Curodont™ can treat early cavities by
supporting the tooth’s natural repair process.

No needle, no stress!

How does Curodont™ work?

By mimicking nature, Curodont™ Repair Fluoride Plus repairs early cavities by using minerals from your own saliva, helping to preserve the natural structure of the tooth. It not only helps stop early cavities from progressing, it supports the natural repair of the tooth – without needles, without drilling, and without traditional fillings.

The benefits of Curodont™

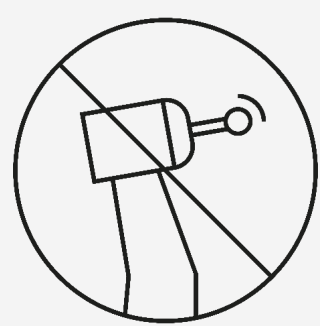

- ✓ Non-invasive: No drilling or needle needed
